Care (Education) and Treatment Reviews (C(E)TRs) and Dynamic Support Registers (DSRs)

Rachel Lucas – Learning Disability and Autism Coordinator
Newcastle and Gateshead Integrated Care Board (ICB)

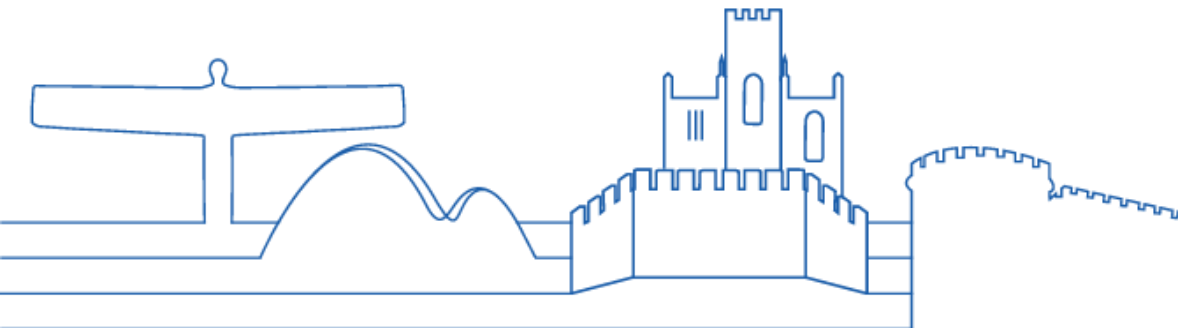

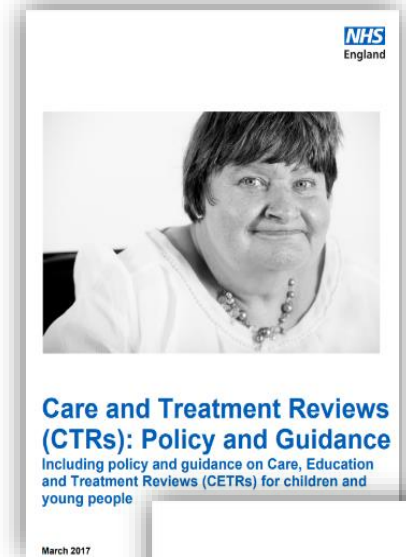

Policy Development

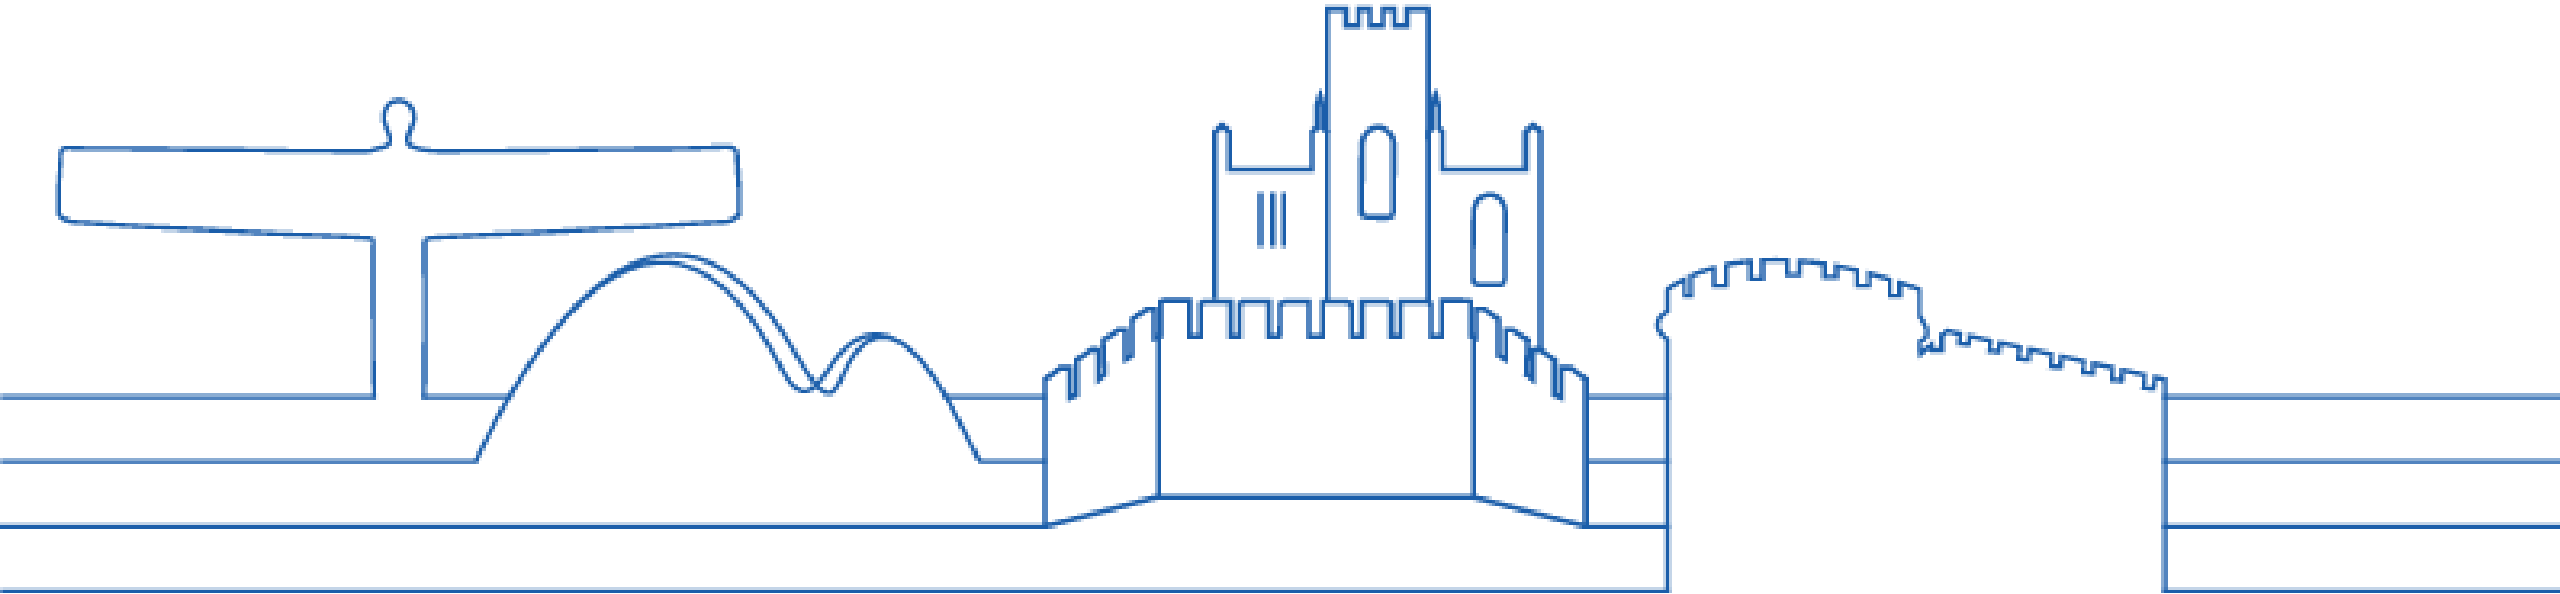

Update on the Publication of the Policy

The combined DSR and CETR policy has now been published and was launched on the 25th January 2023. This replaces the former Care and Treatment Reviews (CTRs): Policy and Guidance published in March 2017.

The updated Policy has supported a 3 month period from its publication up until the 1st May 2023 to allow for changes to be embedded and implemented into practice in local areas.

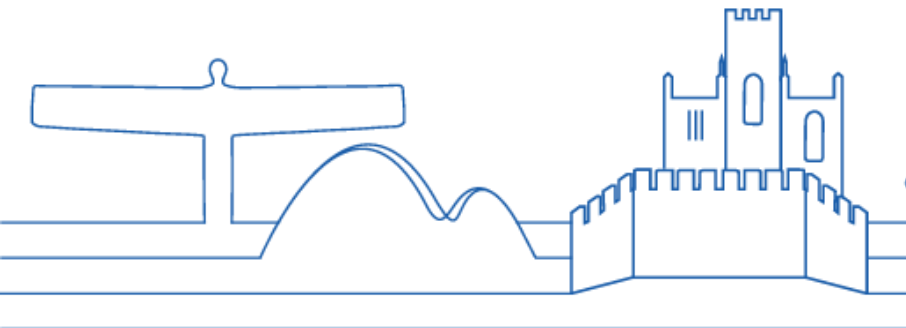

Care (Education) and Treatment Reviews (C(E)TRs)

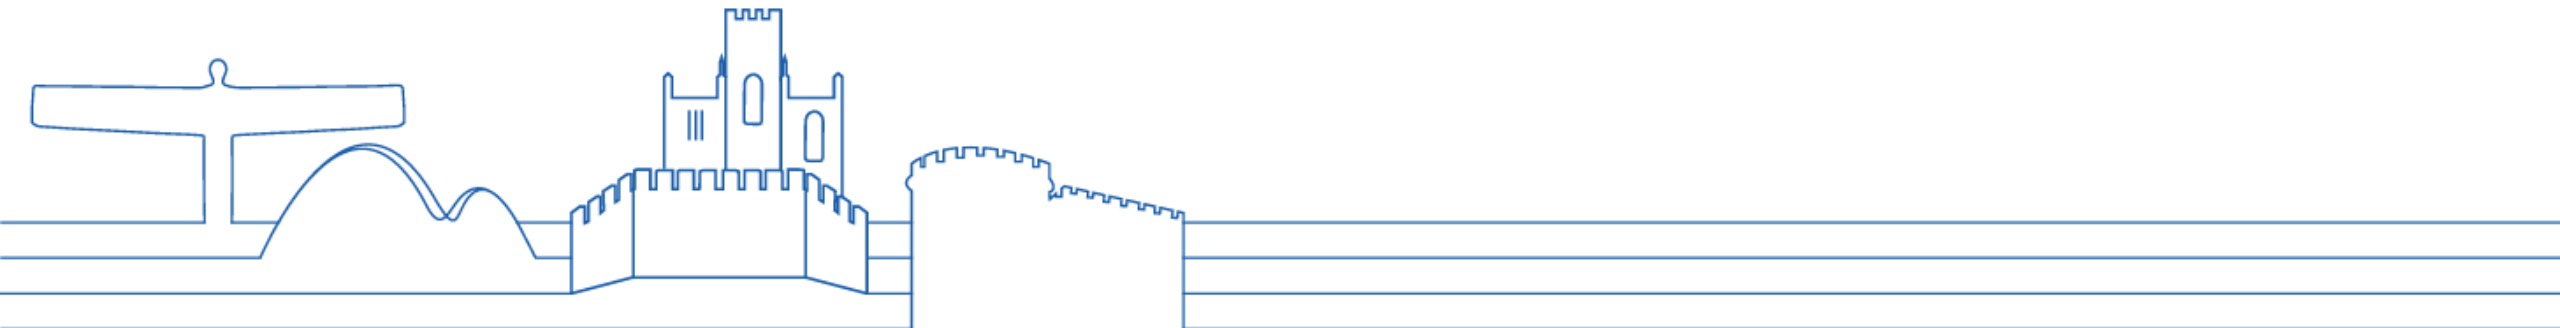

Care (Education) Treatment Reviews C(E)TRs

“A C(E)TR is a meeting bringing together those responsible for commissioning and providing services (including nurses, social workers, local authority representatives, such as from housing and education, and health and social care commissioners) together with independent clinical opinion and those with lived experience of learning disabilities and/or autism, which includes people with a learning disability and/or autistic people and their family carers”

Care (Education) Treatment Reviews C(E)TRs

The aim of a C(E)TR is to check that a person who is either at risk of being admitted or who has already been admitted to a hospital setting is receiving appropriate care that meets their individual needs and that, where possible, challenges are overcome to support discharge to or continued care in the community.

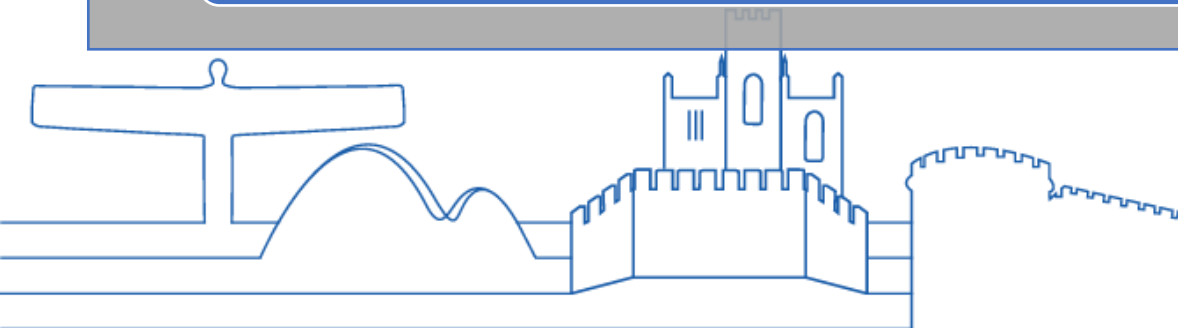

C(E)TRs: What was feedback....

Actions are often not followed up and no-one is held accountable

Physical health checks are often not happening or are not good enough

Agendas can be too rigid and not created based on the person and their circumstances

Advocates do not always attend and where they do their knowledge and relationship with the person is limited

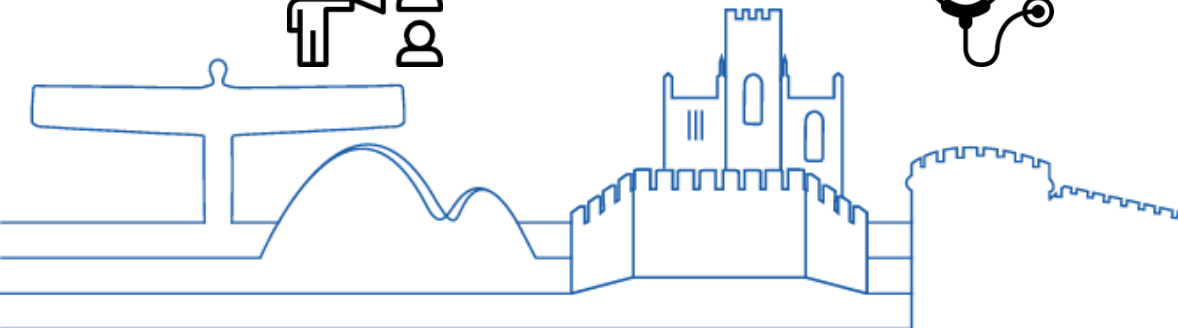

C(E)TRs: What was included in the updated Policy

Increased focus on
advocacy

Increased focus on
physical health

Increased focus on
quality of life

Increased focus on
accountability and
quality assurance

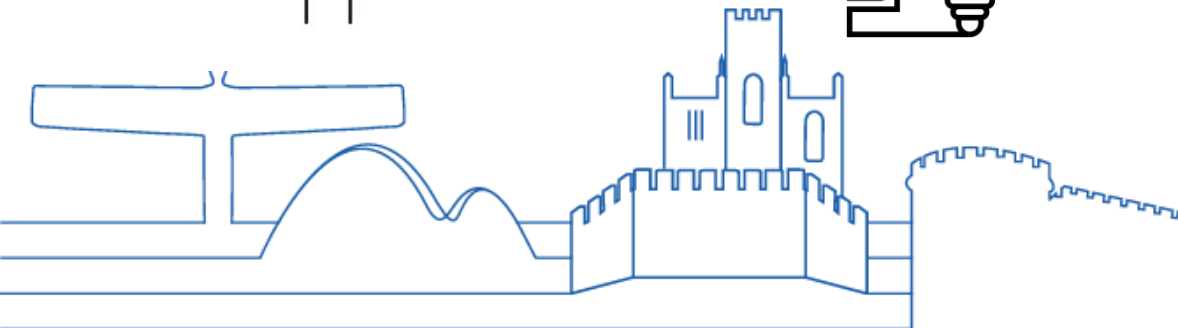

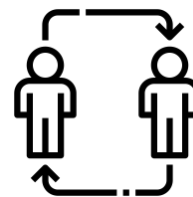

C(E)TRs: What was included in the updated Policy

Greater focus on all panel members having an equal voice

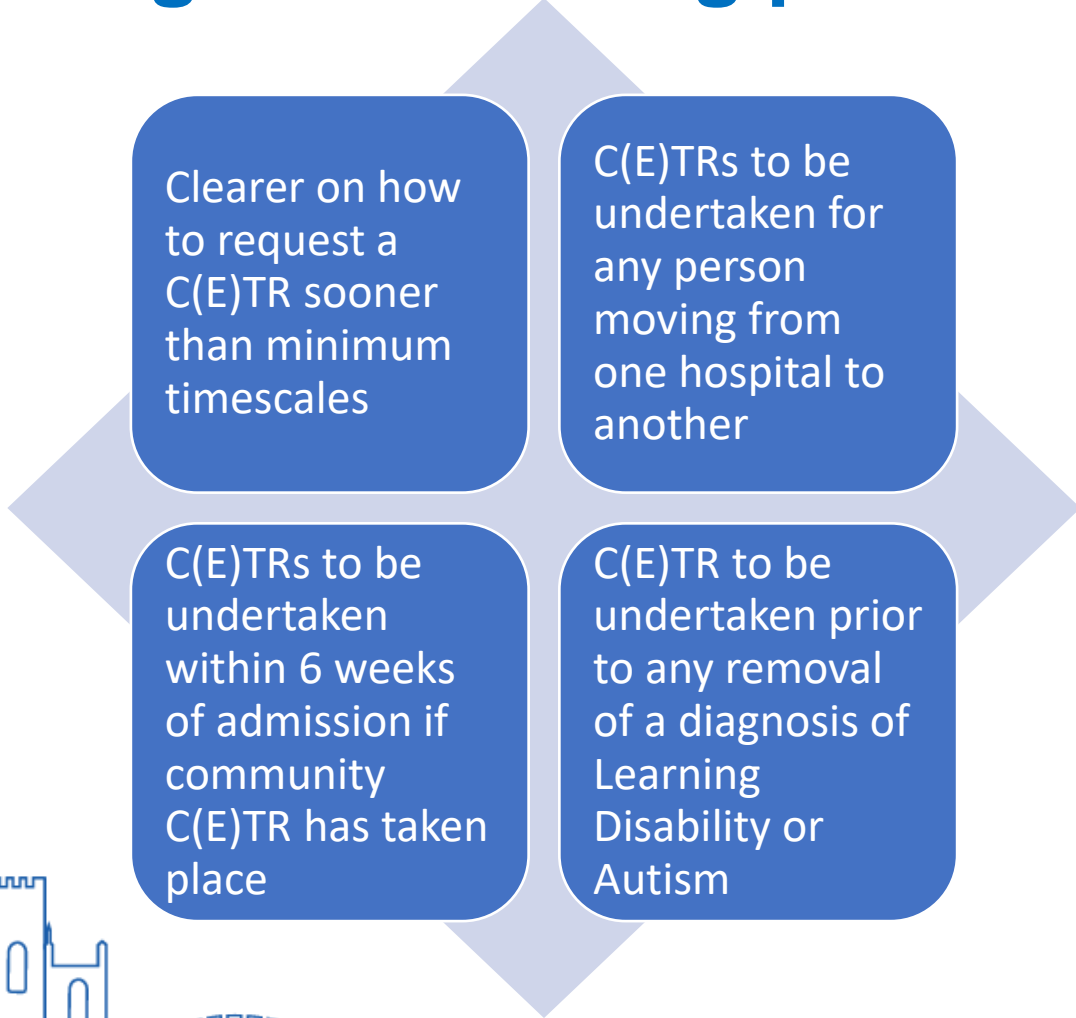

Improved clarity on the escalation process

Greater focus on matching of panel to the person

Links to other processes (Care Programme Approach, Oversight visits)

C(E)TR: Key changes to existing processes

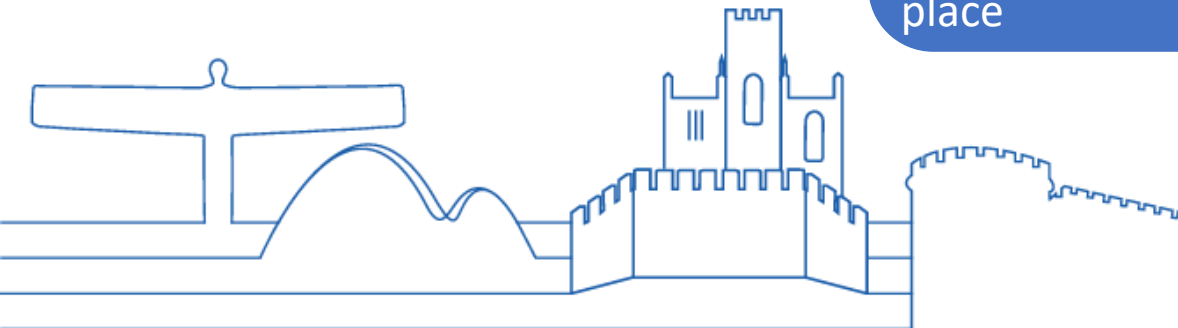

Clearer on how to request a C(E)TR sooner than minimum timescales

C(E)TRs to be undertaken for any person moving from one hospital to another

C(E)TRs to be undertaken within 6 weeks of admission if community C(E)TR has taken place

C(E)TR to be undertaken prior to any removal of a diagnosis of Learning Disability or Autism

C(E)TR: Key changes to existing processes

Payment structure for
Independent Panel
members

Mandatory training
for Independent
Panel members

Option for some
Independent panel to
undertake follow up
review

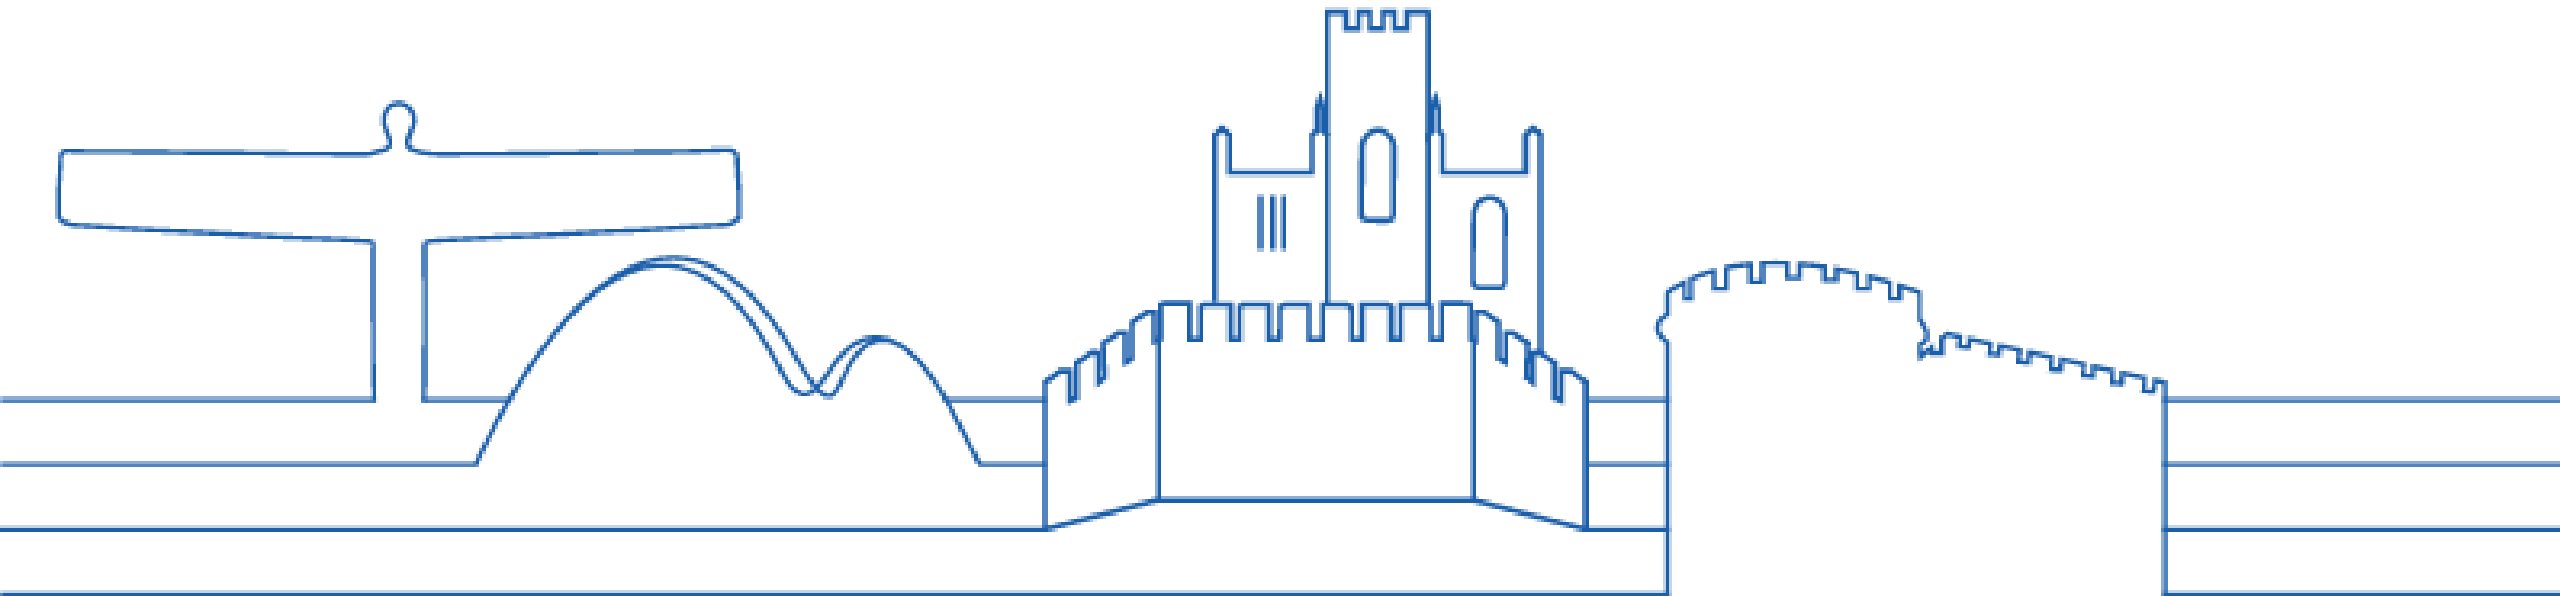

Recommendation for
a Community follow
up C(E)TR post
discharge

New oversight
process through
Oversight Panels

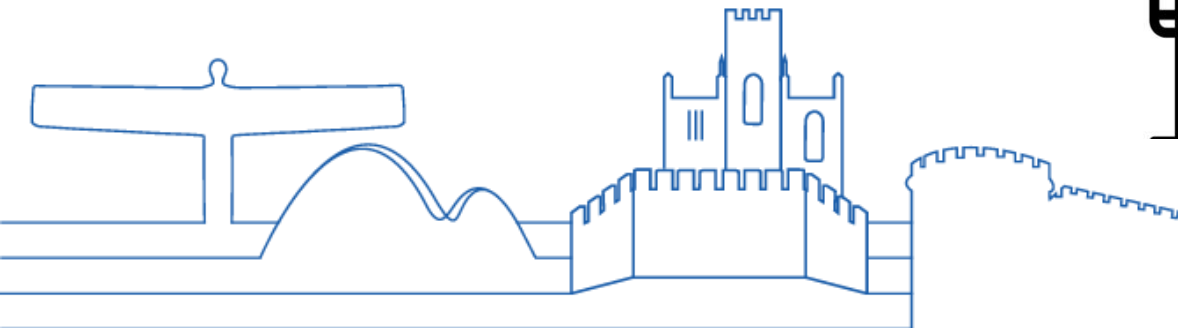

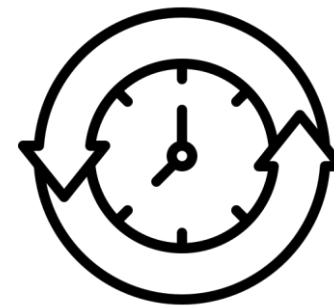

Dynamic Support Register (DSRs)

Dynamic Support Registers (DSRs)

“A Dynamic Support Register (DSR) is the tool used in a local area to identify individual children, young people and adults with a learning disability, autism or both who are at risk or may become at risk of admission to a mental health inpatient setting without specific and timely Dynamic Support”

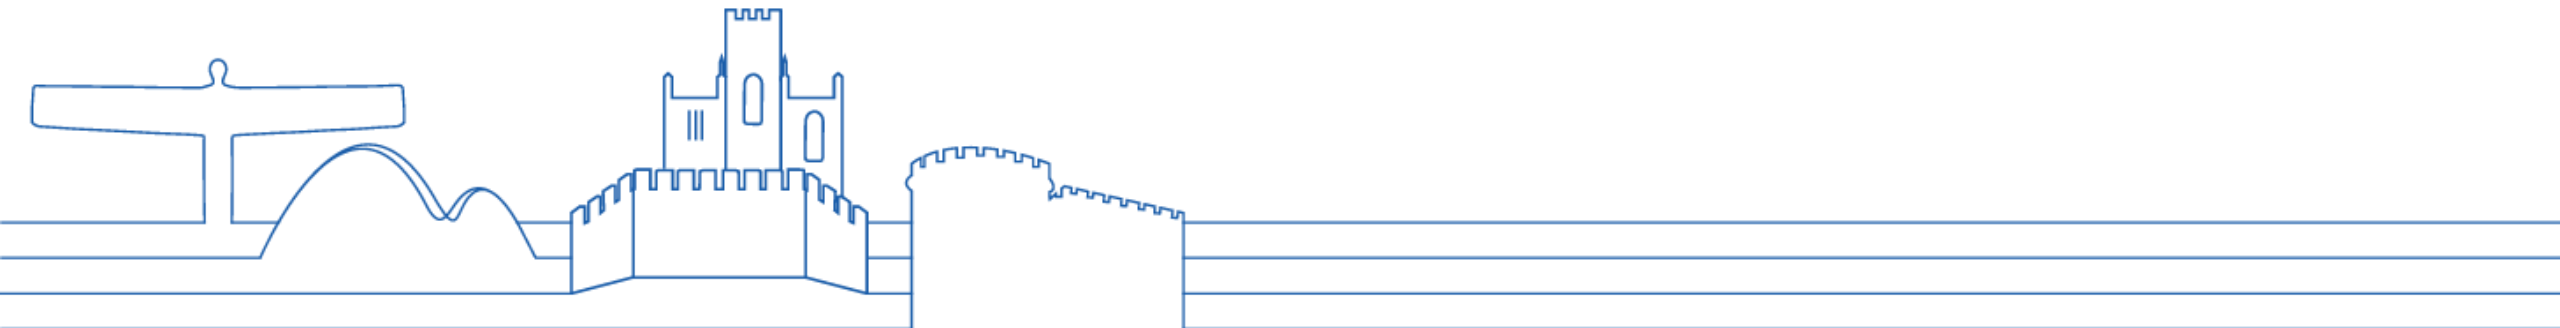

DSR: What was feedback....

There should be a consistent approach to understanding people's needs and the support they might need

There should be no wrong door to ask for help

It's not always clear how to find my local Dynamic Support Register

I am not sure who is responsible for Dynamic Support Register

DSR: What was included in the updated Policy

An increased focus on identifying people at risk of admission to hospital

Increased focus on including autistic people

Increased local visibility and understanding of the Dynamic Support Register

Increased accountability for Integrated Care Boards (ICBs)

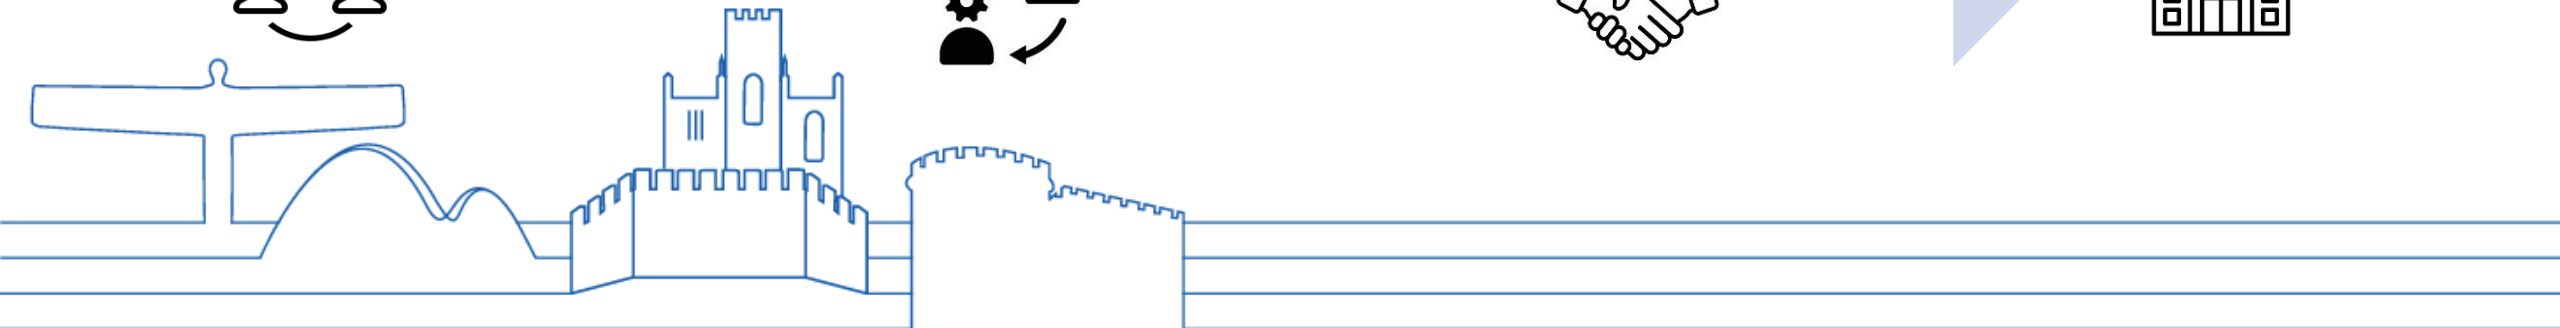

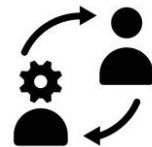

DSR: What was included in the updated Policy

Greater focus on shared ownership across local systems to improve joint working

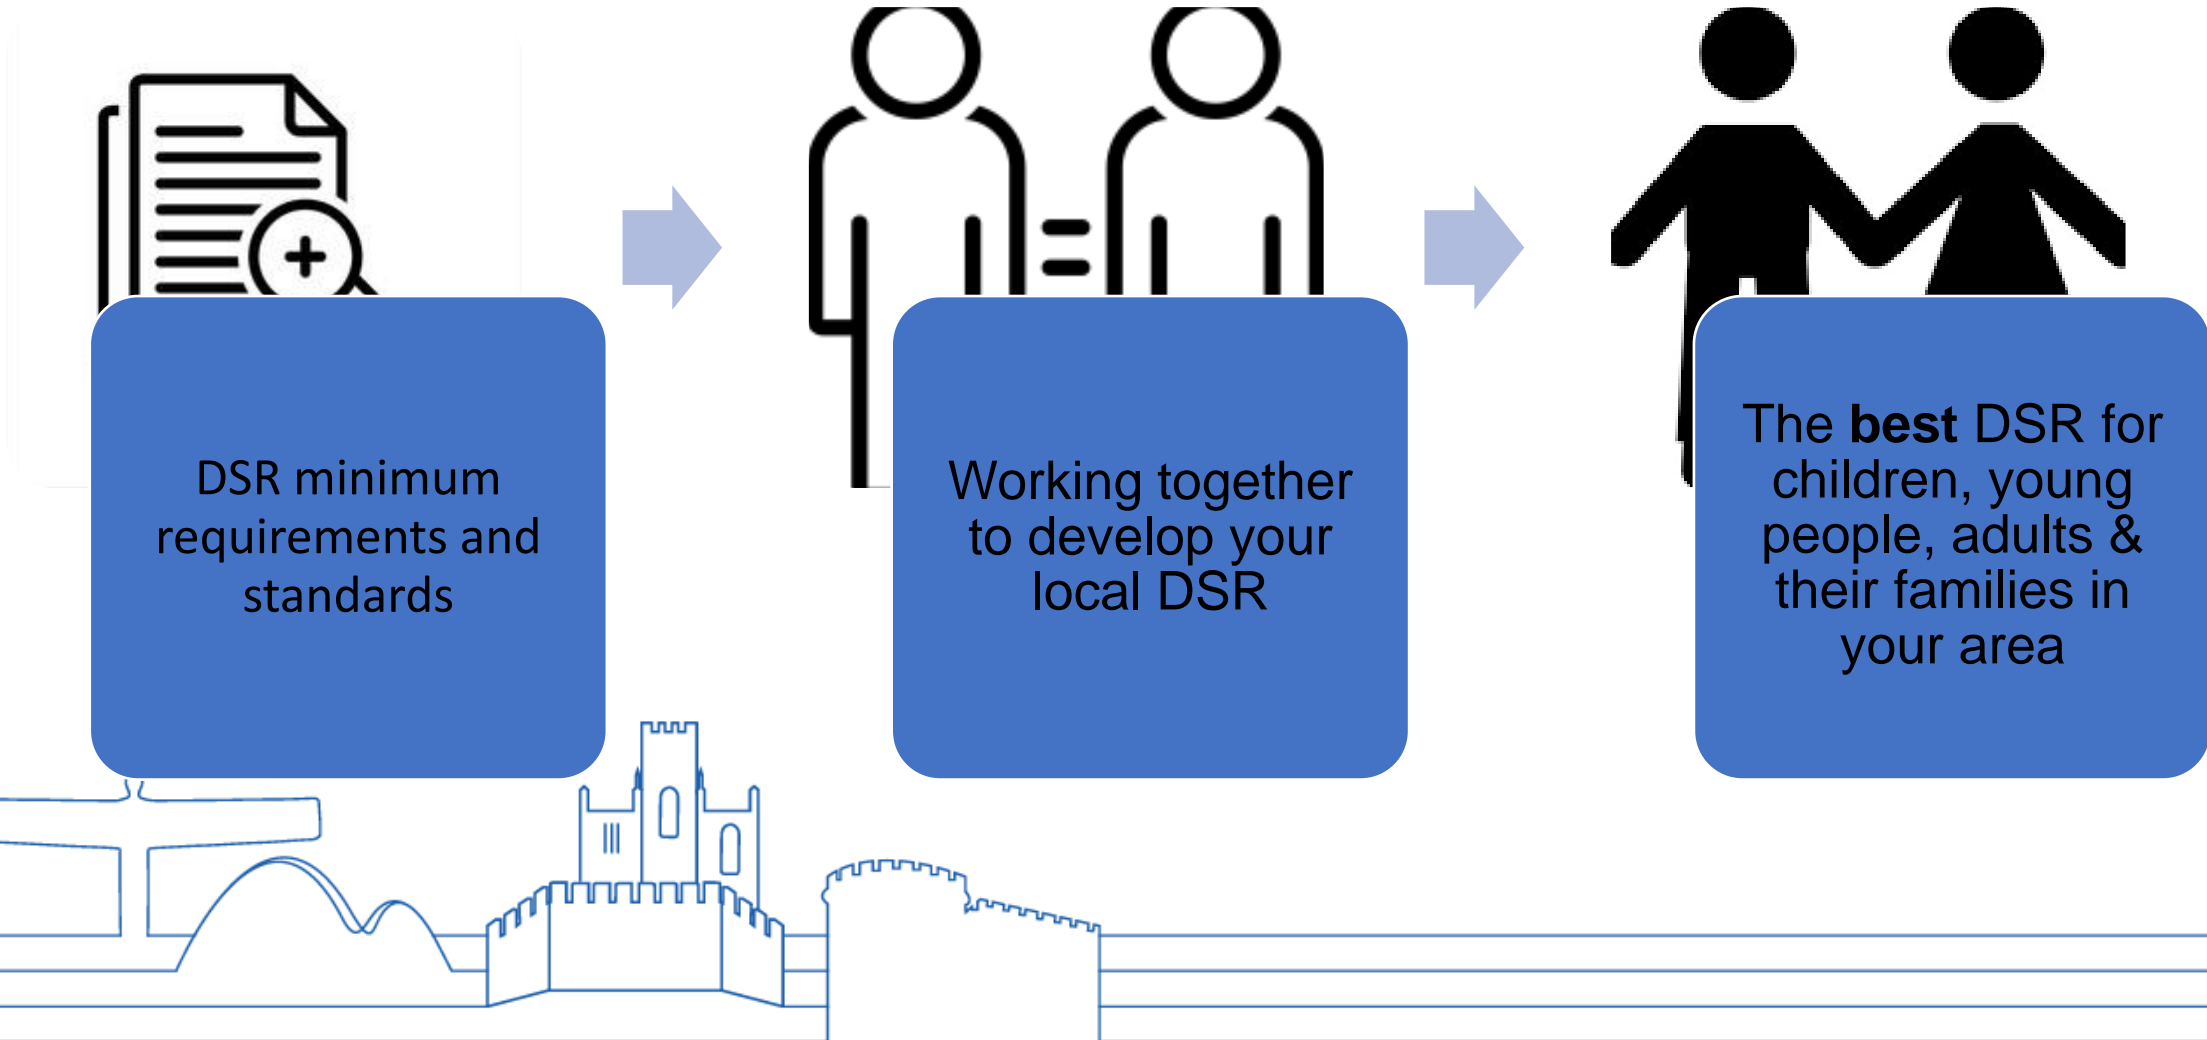

Responsive to changing needs and risk

Dependant on co-produces local implementation

Greater focus on children and young people placed in 52-week residential schools and colleges

Making a DSR that is most useful to your area

C(E)TR and DSR policy next steps

National information sharing events being planned following publication

Talking with partner organisations to support communication of the new policy.

Training being developed with Health Education England.

National research being commissioned into the effectiveness of C(E)TRs

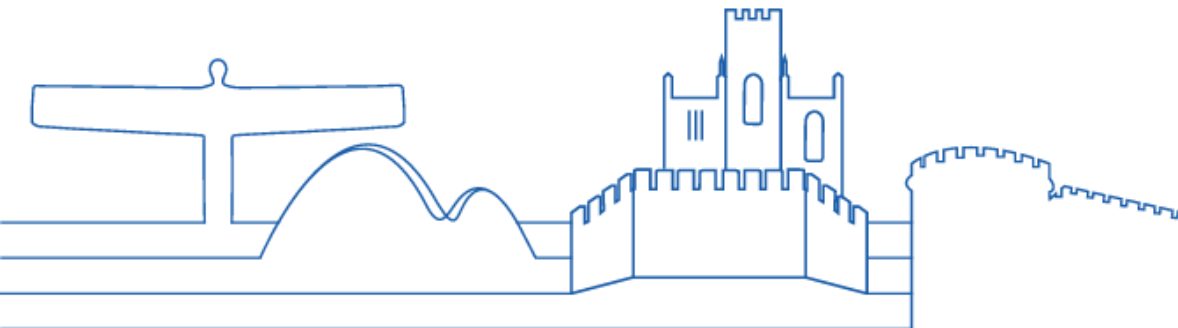

Refresh of the CETR Code of Practice, Toolkit and DSR Audit Tool to support the new policy.

CETR Key Lines Of Enquiry document being updated based on stakeholder feedback

Regions supporting systems to prepare for implementation from May 1st 2023

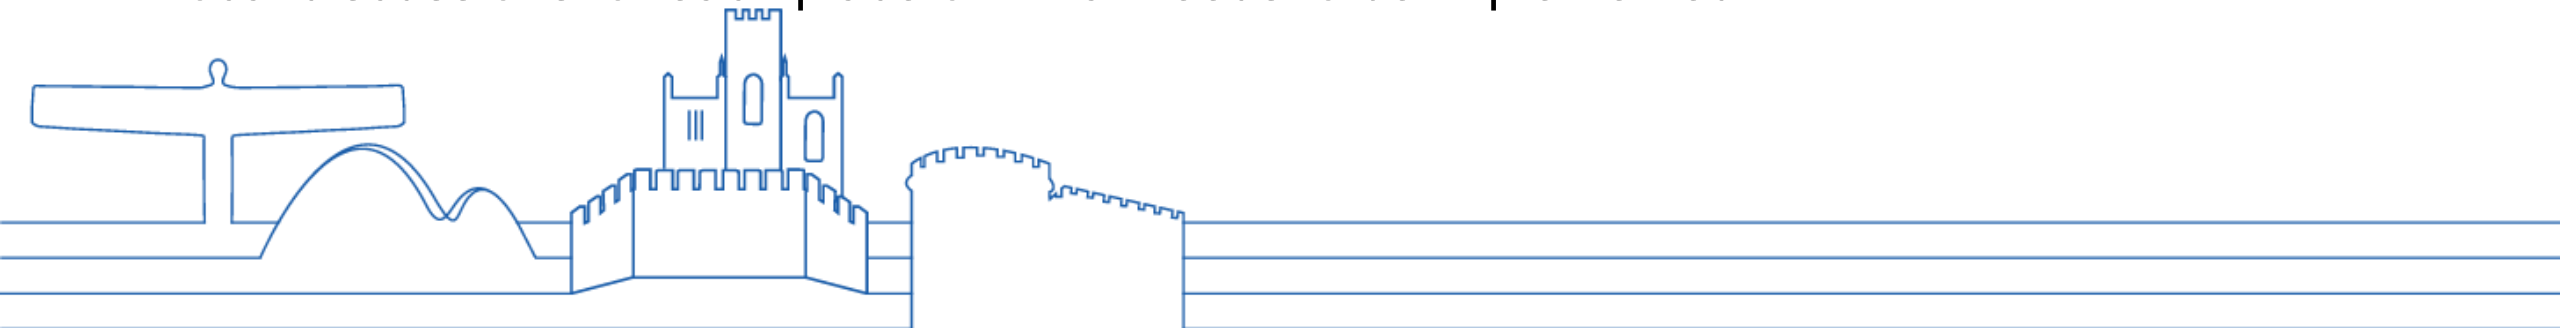

NEXT STEPS

What are the next steps?

- Benchmarking tool to self assess against minimum standards and key changes
- Regional NHSE to support ICB to implement the new policy
- Raise awareness with people with lived experience and parent /carers
- Review Community of Practice, thematic programme to share good practices and challenges
- Themed workshops (NHSE) for specific areas as discussed in ICBs, e.g. assurance panels, place based DSRs, panel member sessions
- Local discussions for each place on what needs to be implemented
